Objective

To obtain an iOS developer position at a forward-thinking company where I can utilize my 4 years of experience developing high-quality iOS apps to contribute to the success of the company and further develop my skills.

Education

- **Vellore Institute of Technology** — Vellore, India
  Bachelor of Technology - Computer Science; GPA: 8.02 — *July 2017 - August 2021*
- **Delhi Public School, Vasant Kunj** — Delhi, India
  Higher Secondary ; Percentage: 86% — *June 2015 - May 2017*

Skills Summary

- **Languages**: Swift, Objective-C, C++, Python
- **Frameworks**: Carthage, Alamofire, CoreData, Firebase, OpenSSL, GoogleMaps, lottie, Cassandra
- **Tools**: XCode, GIT, Postman

Experience

- **Zomato Private Limited** — In-office
  iOS Developer — *Jan 2021 - Present*
  - **Platform**: Currently leading the platform team. Worked on improving the overall crash free user percentage to 99.96 %, better developer experience by reducing build time, improved in house event tracking and reducing event drop percentage, led the track to decrease app install size by over 15 MBs and multiple CI/CD automation projects. Migrated mixed language app from carthage to SPM.
  - **Features**: Built multiple new features into the app and improved user experience and have worked on Siri Suggestions, VoIP calling. Proficient and fast in designing new reusable components using UI Kit.
  - **Pod owner**: Was the menu code owner for 2 years and worked on all development and features on menu page of the app.
  - **Other learning**: Good with SQL dashboards and writing queries in general for fast and efficient debugging
- **TapIn - tapin.news** — Remote
  iOS Developer Intern — *October 2019 - May 2020*
  - **Caching**: Caching of data for offline access using CoreData.
  - **OAuth 2.0**: Integrated OAuth login for multiple social media platform including LinkedIn, Google, Twitter & Facebook
  - **Social media features**: Implemented social media features like Users, Comments, Follow, Reply, Like.
  - **In-App YouTube**: Integrated In-App YouTube experience when it wasn't natively supported.

Projects

- **ARCS'19 iOS Application**: This project involved Google Firebase integration and backend API integration with the portal using Alamofire as well as in-app payment and registration. It also served the option of uploading the source code of the work done in the hackathon by the participants (March 2019)
- **Evoluate**: Evoluate was an app that made learning the evolution process fun and easy. It has a very simple UI to make it easy for children to use. A timeline mentioning the name and year of origin of various species is displayed. The app had Firebase integration for data handling (May 2019)
- **Oxygen Delivery System (Data Structures and Algorithm)**: A project to optimize delivering of oxygen cylinder at 'n' randomly chosen hospitals in the city of Chennai by a single delivery agent using genetic TSP Algorithm and nearest neighbour Algorithm. (January 2018)
- **CleanUp - A sanitation tool**: An application where people can mark the places where there is garbage and the workers can either go and collect from the location itself or our enterprise would provide the services for the 'clean up'. This app was made to cut down middlemen and help rehabilitate patients affected by leprosy.
- **News Article Summarizer**: This project helped to create a summary from a given text/article/journal/story through sentence fragmentation and keyword identification on weighted keywords. The project was built with HTML5, Bootstrap and Python(flask and nltk) (March 2020)

Achievements

- Manager at ARCS'19 - ARCS is a 4 day technical colloquium planned with the aim of enhancing and building up technical knowledge of the young students. The chapter IEEE CS-VIT conducts events, ranging from a hackathon and a congress to several technical workshops
- Coordinator at ARCS'18

Volunteer Experience

- **Core Committee Member at IEEE Computer Society VIT** — Vellore, India
  Conducted technical events to help other fellow students & developed iOS applications — *Dec 2017 - Aug 2019*
