Summary

Senior iOS Engineer with 4+ years of experience building and scaling large consumer applications used by millions. Strong background in platform reliability, crash reduction, performance instrumentation, analytics infrastructure, and developer experience, combined with hands-on ownership of complex user-facing features. Highly proficient in UIKit and SwiftUI with a focus on reusable UI systems and polished end-to-end product delivery.

Education

- **Vellore Institute of Technology** — Vellore, India
  B.Tech in Computer Science; GPA: 8.02 — *2017 – 2021*

Skills

- **Languages**: Swift, Objective-C, C++, Python
- **iOS**: UIKit, SwiftUI, Auto Layout, CoreData, App Lifecycle, Background Tasks
- **Frameworks**: Firebase, Alamofire, Lottie, GoogleMaps, OpenSSL
- **Tools**: Xcode, Git, CI/CD, SQL dashboards, Postman

Experience

- **Zomato Private Limited** — India
  Senior iOS Engineer — *Jan 2021 – Present*
  - **Platform & Reliability**: Led platform initiatives improving crash-free user rate to **99.96%**. Integrated advanced crash reporting, breadcrumbs, and startup performance optimizations across the app.
  - **Performance & Analytics**: Built in-house analytics and performance tracing infrastructure including FPS monitoring, API traces, and rendering metrics, reducing event drops and improving observability at scale.
  - **Developer Experience**: Reduced build and setup times via dependency caching, CI/CD automation, and tooling improvements. Led migration groundwork for modularization and SPM adoption.
  - **Feature Development & UI**: Owned and shipped multiple customer-facing features across Menu, Checkout, Search, and Order flows. Designed reusable UIKit components, complex layouts, animations, and performance-sensitive UI.
  - **Menu Platform Ownership**: Primary code owner for Menu platform for 2+ years, leading feature delivery, refactors, experiments, and long-term maintainability of a core surface.
  - **Advanced Integrations**: Implemented over-the-air localization updates and built VOIP calling flows using Twilio SDK, handling call lifecycle, tracking, and reliability improvements.
  - **Data & Debugging**: Used SQL-based dashboards to debug production issues, analyze funnels, and validate experiments.
- **TapIn (tapin.news)** — Remote
  iOS Developer Intern — *Oct 2019 – May 2020*
  - **Product Features**: Implemented offline caching with CoreData, OAuth authentication, social features, and in-app YouTube playback.

Projects

- **ARCS'19 iOS App**: Built and deployed a production iOS app with Firebase, backend APIs, and in-app payments for a national technical conference.
- **Evoluate**: Educational iOS app featuring a timeline-based UI and Firebase-backed content management.
- **Oxygen Delivery Optimization**: Designed an optimization system using genetic algorithms and TSP heuristics for efficient medical supply routing.
- **CleanUp**: Mobile application enabling direct sanitation issue reporting and worker coordination.

Leadership

- Manager, ARCS'19 — Led a 4-day national IEEE Computer Society technical symposium.
- Coordinator, ARCS'18 — Organized technical workshops and hackathon events.
- Core Committee Member, IEEE Computer Society VIT — Built iOS apps and conducted technical events.
